DETAILED ACTION

1. Applicant's Response to Final Office Action, received 15 March 2004, is acknowledged.

Claims 1, 6, and 11 have been amended.

2. Claims 1-29 are pending and under consideration.

Rejections/Objections Withdrawn

1. The rejection of claims 1-29 under 35 U.S.C. 112, first paragraph, scope of enablement for detection of an antibody to a particular mycobacterium species utilizing an antigen from any/all other species of mycobacterium, is withdrawn in light of the amendments of the claims and applicant's arguments.

2. The objection to claim 6 is withdrawn in light of the amendment of the claim.

Conclusion

3. The examiner has reviewed U.S. Pat. No. 4,391,904. While the patent does teach assay methods, it does not teach or make obvious the instant claims because of the sequence of steps in the instant claims wherein a sample is contacted first with a conjugated label which forms an antibody-conjugated label complex prior to the preparation coming into contact with immobilized antigens.

4. Claims 1-29 are allowed over the prior art of record.
